Mr. Daniel M. Stuck
P.O. Box 532
Yorktown, VA 23690

Dear Mr. Stuck,

On May 10, 2000 I sent a letter to Mr. Q. D. Elliott, Williamsburg Resident Engineer, with the Virginia Department of Transportation as a follow-up to a location public hearing held at York High School regarding the Fort Eustis Boulevard (Route 1050) extension project. In that letter I communicated that Virginia Power opposes placements D and F due to the fact that they both cross Yorktown Power Station's ash disposal facility. Placement F would preclude development of multiple future disposal cells and placement D would interfere with the next cell to be developed and would cause the station to modify either the on-site water retention ponds or the active bottom ash cell. Either of these placements would increase our cost of ash disposal over time.

Yorktown Power Station favors placement C. This placement would not adversely impact our ash management ability.

I met with Messrs. Fred Davis and Roger Ward of the Hampton Roads District office of VDOT on August 17. Mr. Davis is an Environmental Engineer for VDOT. After reviewing the placement maps and touring our ash facility, Mr. Davis stated that in his opinion placement C would be justifiable.

Our request is that the extension placement of AC or BC be recommended and adopted.

I am available to discuss this with you or anyone from your staff. My office number is 898-2532. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink that reads "Donnie Craft". The signature is fluid and cursive, with a long horizontal stroke extending from the end.

Donnie Craft – Regional Station Director, Yorktown Power Station
